INVITATION

Symposium

Spatial and Environmental Planning in CEE Countries 2011

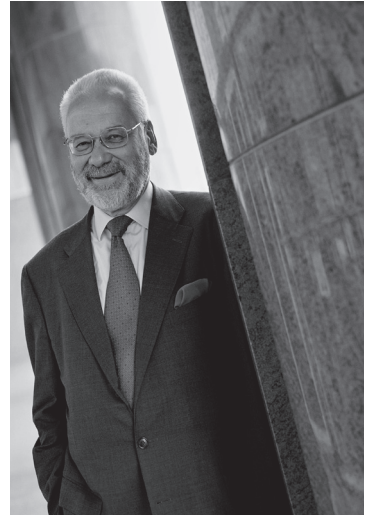

Infrastructure = Development

January 13th - 14th 2011

Vienna University of Technology
Prechtlsaal
Karlsplatz 13, 1040 Wien

Spatial and Environmental

Since 1989 especially Austria is a total different situation in Europe with a lot of chances. This is connected with the economic development, which has a precondition spatial and environmental planning in the CEE countries. In this symposium we are trying to focus on the different fields, on the necessities and where the different actors are standing. It is of extreme importance for the regional development in Central- and Eastern Europe because until now there are still lacks of infrastructure, which are giving not only a lot of economic chances but also scientific and technical challenges, which might be an interesting subject for the Vienna University of Technology. We intend to make an exchange with experts and actors involved to get an overview, where we are standing in the moment.

Vice chancellor a. D. Hon. Prof. Dr. Erhard Busek
(Ad personam Jean Monnet Chair)

Program (lectures in german and english)

Thursday, January 13th 2011

- | | | |
|-------|--|---|
| 09:00 | Registration | |
| 09:30 | Welcome address | Adalbert Prechtl,
